.

Tech professional with 20+ years experience in industry and academic research. Wide background in Generative AI, Blockchain, and Hardware Acceleration.

Skills: large language models, generative AI, open source software, optimization, devops, project management, system architecture & design

Professional Experience

Senior Research Scientist, IBM Research
Aug 2022 – Present, Singapore

- Contributor to IBM Foundation Model Stack (FMS) for training of generative AI models.
- Tech lead for IBM Foundation Model Stack (FMS) Acceleration, compantion stack to FMS for training enhancements including quantization, distributed training, kernels, etc.
- Contributor to Huggingface open source.
- Contributor to IBM InstructLab Training Library for instruction grounding of AI generative models.

Skills: Python (Programming Language) · Open-Source Software · Artificial Intelligence (AI) · Generative AI

Research Scientist, IBM Research
Jul 2020 – Aug 2022, Singapore

- Lead on internal AI Operations project on log analysis, aiding service engineers to investigate issues for variety of IBM products.

Skills: Scholarly Research · Artificial Intelligence (AI) · Applied Probability · Natural Language Processing (NLP) · Software Deployment

Research Manager, IBM Research
Aug 2018 – Feb 2020, Singapore

- Lead on asset tokenization platform on Hyperledger Fabric, delivering a minimum viable prototype.
- People management for a team of scientist and engineers, and played key role for leadership and growth of the lab.

Skills: R&D Management · Software Project Management

Research Staff Member / Scientist
Mar 2016 - Aug 2018, Singapore

- Lead on private sharing protocols for permission-ed blockchains for the Shared KYC project with Deutsche, HSBC, MUFC banks and Cargill.
- Founding member of the IBM Center for Blockchain Innovation in Singapore.

Skills: Software Project Management · Blockchain · Cryptography

Senior Staff Engineer, SK Hynix Memory Solutions
Nov 2014 – Mar 2016, San Jose, CA

- Analyzed and developed models for flash storage systems.
- Developed simulator platform for prototyping and testing on flash storage.

- Developed error recovery systems for flash storage.

Skills: Error Correction Codes, Algorithm Architecture, Hardware-Software Verification

Staff Engineer, LSI Corporation (an Avago Technologies Company)
June 2013 – Nov 2014, San Jose, CA

- Developed algorithms and designed architecture for hard drive data controllers.
- Investigated modern iterative-type error-correction codes for pushing recording densities.

Skills: Error Correction Codes, Algorithm Architecture, Hardware-Software Verification

Awards & Recognition

- National Science Foundation Grant, *"Energy-efficient compressed sensing: A joint algorithmic/implementation approach using deterministic sensing"*, Massachusetts Institute of Technology.
- Lockheed Martin Orincon Scholarship, University of Hawaii, Manoa.
- Research Scholarship, National University of Singapore.

Recent Projects

Foundation Model Stack (FMS) Acceleration (2024)

- Core Developer & Maintainer of a series of ML acceleration 🚀 plugins for IBM Foundation Model Stack for introducing training speedups (e.g., quantization, kernels, packing, etc).

FSDP and DeepSpeed (blog) (2024)

- Core investigator of Huggingface 🤗 blog and concept guide on the equivalence of two ML distributed training frameworks MS DeepSpeed and PyTorch Fully-Sharded Data Parallel (FSDP).

Mixture-of-Experts (MoE) Distributed Training (2024)

- Core Investigator into incorporating expert-parallel for speeding up MoE Training (full- or fine-tune).

Optional Transport With Order Constraints (2022)

- COre Mainatainer of companion repository for our 2022 ICML Paper Order Constraints in Optimal Transport.

Education

- **Postdoctoral Associate**: Massachusetts Institute of Technology, Cambridge, MA
- **Doctor of Philosophy in Electrical Engineering** : University of Hawaii, Manoa, *Ordered Statistics Decoding for Intersymbol Interference Channels*
- **Master of Engineering in Electrical Engineering**: National University Of Singapore, *Optimal Precompensation in High Density Magnetic Recording*
- **Bachelors of Engineering in Electrical Engineering**: National University Of Singapore

Selected Publications and Patents

- **F. Lim**, "FSDP to DeepSpeed and Back Again", *Pytorch Conference 2024*, San Franscisco, CA, Aug 2024.
